

Product Information

KTHE 60 Series

KXHE60 **HEAT EXCHANGER** **6-1/4" WIDE**

The KXHE60 is an ideal choice for applications in dirty or oil-laden environments where cabinet temperatures can be above ambient. The high efficiency convoluted heat transfer element obtains maximum heat transfer efficiency in a small closed-loop system.

The units narrow profile takes up less precious cabinet space while its performance maintains the cabinet temperatures needed for lower heat-load applications.

KXHE60 Mini Heat Exchanger

FEATURES

- 6 1/4" W x 22 1/2" H x 4 1/4" D fits thin cabinets and small panel surface areas
- Closed-loop cooling keeps dirt and moisture from sensitive components
- Refrigerant-free aluminum plate type element
- Removable heat transfer element for easy cleaning
- Quiet, long life UL /CSA ball bearing motors
- Rugged heavy duty steel construction
- Durable baked epoxy finish is esthetically pleasing
- Top, side or back mounting possible for complete design flexibility
- Bolt hole compatible with competitive units
