FOR IMMEDIATE RELEASE

KOOLTRONIC AIR CONDITIONER RETIRED AFTER 28 YEARS OF CONTINUOUS SERVICE

November 19, 2007 – Pennington, NJ

Kooltronic was recently contacted by US Enrichment regarding replacement of Kooltronic Air Conditioner model KAC8-52. This unit was retired from use at their Ohio facility, which contracts with the United States Department of Energy to produce enriched uranium for use in nuclear power plants. Based on the serial number, this unit was manufactured in 1979.

As a point of reference, when this unit was made, Jimmy Carter was President, Kramer vs. Kramer was #1 at the box office and milk was \$1.00 a gallon.

In a world where planned obsolescence and disposable products are the norm, Kooltronic is proud that its products stand the test of time. As the pioneer in the manufacture and design of industrial cooling products, and the originator of air conditioning for enclosures, Kooltronic continues to exceed customer expectations in North America and around the world.

With over 60 years of service to its customers, Kooltronic is the leading manufacturer of custom-designed and standard air conditioners, heat exchangers, fans and blowers designed specifically to cool the interior of enclosures containing heat sensitive electrical/electronic components. The company has a complete engineering and manufacturing facility and sales office at its headquarters in Pennington, NJ.
